

Retail Development

10% faster average store delivery with OxBlue: M&M Development Company - Knoxville, TN

M&M Development, a leading Knoxville-based developer, has completed more than 100 Walgreen's stores in the last 10 years. Since implementing OxBlue construction cameras in 2003, M&M has reduced store delivery time to an average of 150 days, roughly 10% faster than average for all Walgreen's stores nationwide. OxBlue webcams are now used on all of M&M's Walgreen's projects.

“OxBlue cameras are a key factor in our ability to complete stores faster. We're able to identify problems faster and focus resources more effectively. We have more productive meetings with our architects and general contractors because we're all looking at the same progress photos. It speeds up the whole process of coordination and communication because it's so easy to use.”

Chet Carbaugh, AIA, M&M Development Company
