

# NON-PENETRATING ROOF MOUNT

Install your construction camera without mounting it to a permanent fixture with our series of non-penetrating roof mounts (NPRM). The options are available in 8 or 10 feet and will need a ballast weight to keep the mount in place and stable. The ballast weight depends on the location, elevation, and roof material of the intended camera location.

Mast places camera above standard roof parapets

Concrete block/sand bag serves as ballast weight

Durable aluminium construction

Base pad to avoid damage on concrete or gravel

## Base Dimensions

Model B3	Model B4
2.91 ft L (0.87 m)	6.25 ft L (1.91 m)
3.33 ft W (1.01 m)	6.00 ft W (1.83 m)
9.69 ft <sup>2</sup> (0.90 m <sup>2</sup> )	37.50 ft <sup>2</sup> (3.48 m <sup>2</sup> )

## Mast Height

8 ft or 10 ft (2.43 m or 3.04 m)

## Concrete Block Capacity

Model B3	Model B4
Ten	Sixteen

## Mast Diameter

Diameter 2.75" O.D. maximum (6.99 cm)

## Hardware

Base pad (included); ballast (not included)
