SEAMLESS INTEGRATION WITH OXBLUE & PROCORE

OxBlue's integration with Procore provides instant access to all your job site data in one application. By centralizing project information, you can easily document, view, and organize job site photos, specs, as well as drawings.

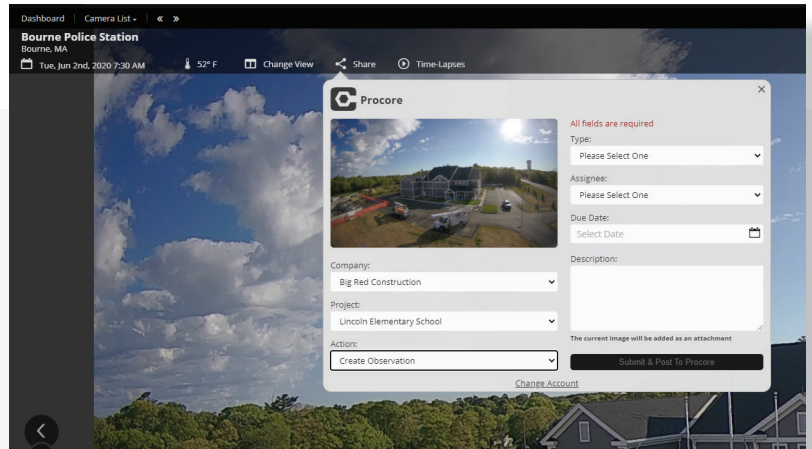

New Procore share options available for creating a Request for Information (RFI) or Observation
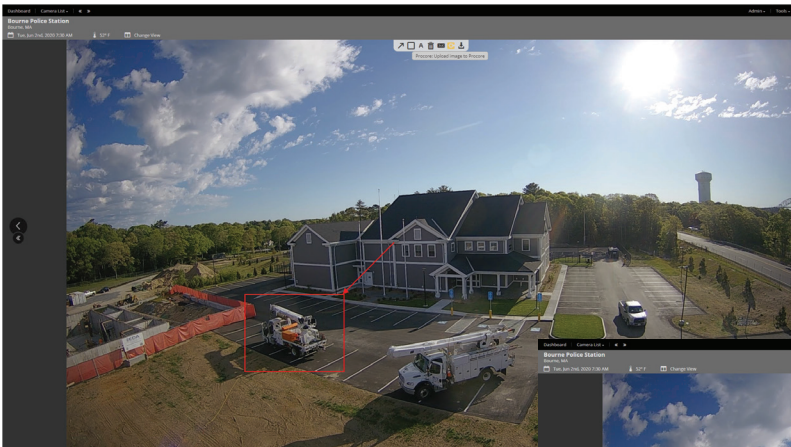

PROCORE™
CLOUD-BASED CONSTRUCTION SOFTWARE

Easily create a Request for Information (RFI) directly from the image you are currently viewing for quick and easy reponse times

Create an Observation directly
from your current image to
keep your team up to date
on jobsite progress

Combine the new Procore sharing
features with the Mark-Up tool
to highlight specific areas of your
image for review or comment

Streamline job site management by uploading photos into Procore to easily review/compare
images to project details and use that information to keep the project on track and on budget.
